

## WHY CHOOSE THE SMART PICK WELFARE?

- ✔ The Smart Pick Welfare Unit is an **award winning** welfare unit and the best welfare unit available on the market.
- ✔ Our Smart Pick Welfare unit's **canteen can accommodate up to 10 people** and comes with a fully functional canteen with quality appliances as standard i.e. **kettle, microwave, fridge and grill**.
- ✔ **Easy to operate** - simply switch on appliances (kettle or microwave) and generator starts up automatically. When appliance has finished generator switches off.
- ✔ The Smart Pick also extends to provide a fully functional **separate office for 2 people**. This space is furnished with desk chairs, USB ports, notice boards etc.
- ✔ Rego Hire can offer a **complete package** from delivery and collection to weekly servicing of this smart pick welfare unit.

## WHAT OUR SMART PICK WELFARE UNITS OFFER

- ✔ The Smart Pick Welfare Unit meets all of your construction site requirements including canteen facilities, drying room, toilet and office.
- ✔ This award-winning unit has been designed to provide the highest levels of safety, security, strength and comfort in the most remote and exposed locations.
- ✔ The unit is economical to run using an intelligent Green X Power Management System which reduces fuel consumption and running costs by up to 75% compared to standard welfare units.
- ✔ The diesel heater can be pre-set to run for up to 3 hours and will automatically shut off. This will allow your wet work gear to be fully dried out before the start of another day.
- ✔ The unit is fitted with non-slip chequered aluminium flooring throughout, making it durable and suitable for the toughest onsite conditions.
- ✔ The unit is compact while being delivered with an ability to extend on site from 5.4m to 7.2m offering a larger unit.
- ✔ Our Smart Pick trailer system allows units to be delivered to even the most space restricted sites.

*With 20 years of experience in meeting customer demands our Mobile Welfare Units are simply the best in the market.*

**This efficient system reduces fuel consumption and run time by up to**

**75%**
